

Fast Start Gel

Fast and reliable rooting gel

With Fast Start Gel:

- cuttings develop roots faster and better
- survival rate of 100% under the right conditions
- helps grow vigorous, well-rooted young plants in the shortest time possible

Fast Start Gel offers many advantages:

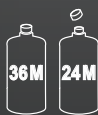

- cuttings will be well-rooted in no time
- cuttings are clearly stronger and more vigorous than untreated ones
- faster transition to the growing phase
- healthy cuttings are the foundation of a successful crop

2-3 additional applications with Fast Plants Spray brings even more advantages:

- no more limp, hanging leaves from cuttings
- the usual signs of nitrogen deficiency are prevented
- vital nutrients are provided directly to the foliage, relieving roots in this most critical stage

Fast Buds is available in the following sizes:

- 50ml bottle with injection lock
- 100ml bottle with injection lock
- 250ml bottle with injection lock
- 1 l bottle with injection lock
- 5 l canister
- 10 l canister

Application:

DO NOT shake before use!

For taking cuttings:

- Take desired amount from bottle. Then squeeze remaining air from bottle and close tightly. Keep refrigerated after opening.
- Soak the cuttings where the cut was taken immediately for 2-3 minutes in Fast Start Gel.
- Next, stick cutting into the rooting media of choice.
- Remaining gel can be used to seal the holes in which the cuttings were placed.
