

# Humic Acid Plus

## Soil additive for an active soil life in any growing media

### With Humic Acid Plus:

- fertilizers are more effective and less nutrients are drained to waste
- plants show clearly higher nutritional needs due to increased cell stability and size
- contained microbes accelerate the production of biomass, which results in higher yields of enhanced quality and taste.

### Humic Acid Plus offers many advantages:

- improves soil structure and plants' water-holding capacity
- natural catalyst for microelements
- higher permeability of the roots' cell membranes, resulting in better nutrient uptake
- encourages plants to produce enzymes
- delays the reduction of UV-unstable active ingredients like vitamins and iron

### Humic Acid Plus is available in the following sizes:

- 250ml bottle
- 500ml bottle
- 1 l bottle
- 5 l canister
- 10 l canister

### Application:

Humic Acid Plus can be applied during the entire life cycle and in any growing media.

### Seedlings and Cuttings:

- 5ml per 1 liter of water
- Soak the growing media well before planting. Remove excess water. Rockwool should be squeezed out. Causes no problems with other rooting agents or nutrients.

### All other life stages:

- 2-5 ml per 1 liter of water
- As Humic Acid Plus is a natural plant aid, it can be applied with each watering without causing nutrient burns of any kind.

### As a flavor enhancer:

- 5 ml per 1 liter of water
- Continue to use regularly after rinsing until harvest.
